San Diego, Calif. 92120

Dear Sirs,

We are now ready to wire the Narrow guage division that we recetnly built into our standard HO guage lay-out. Please whip the below listed equipments as soon as possible.

1. 10 D-2 Detection Units
2. 1 TAT IV Throttle Kit (without case)
3. 5 SCRs (used in CD-1)

Enclosed is a check for \$150.00, If this does not cover the amount of purchase please notify us immediately. If you will I would appreciate your shipping the equipment and billing us for any difference.

Sincerely Yours

Bill Whitmer
Electrical Committee Chairman

30 September 1974

Sirs:

I'm sure the name in the upper right corner is familiar to you, but I know mine is not. Bill Whitmer suddenly got sent to Japan, and I have been appointed the new committee chairman.

Now to our problem. We're using a CD-1 system to control our transfer yard, and last week it died. It's not your fault, by any means - someone reworked the PC board some time ago, and changed the circuit. However, the emergency comes because we have a three-day open house on 8 through 10 November, and we need the following order before then:

2 each CD-1 units	@12.00	total \$24.00
2 each CD-2 units	@14.00	total 28.00
		<u>\$52.00</u>

To facilitate handling at this end, please rush the units to me at
SSG John Maschmeier
1261-A Ruckman Ave
Presidio San Francisco, CA 94129

Enclosed is our check for \$52.00, to cover the cost of the units. I would appreciate it if you could bill us for any balance due, but please use my address, not the clubs.

I would also appreciate it if you could send me a telephone number, that I might speak with you directly if future problems arise.

Thank you in advance for your cooperation and speed.

Sincerely,

John M Maschmeier
Ch, Electrical Committee
